## Summary

I am a highly skilled frontend web developer designing, developing, and maintaining the front-end of web applications. Achieved measurable success in design dynamic, complex and interactive user experience. Highly experienced and proficient in React JS.

## Skills

### Core Skills

• React.js • HTML 5 • CSS3 • Tailwind CSS / Bootstrap • JavaScript (ES6) • Express.js • Node.js • MongoDB • Firebase • JSON • GitHub • Vercel

### Soft Skills

• Hardworking • Time Management • Teamwork

## Project

### Alternative product (suggestion platform)

[Live Site](#) | [Client Code](#) | [Server Code](#)

This site is primarily designed to allow users to suggest alternative products for existing items and delete any incorrect suggestions. Users must authenticate themselves first, using a sign-in function commonly implemented with Firebase for secure access.

#### Key Features:

- Any legal entity can make product suggestions under any existing product.
- You can post a product to find alternative options for any existing product.

Technology Used: React, ExpressJS, MongoDB, JavaScript, Firebase, Tailwind, Daisy ui

### Product showcase service (Electronic product showcase)

[Live Site](#) | [Client Code](#) | [Server Code](#)

This project is a full-stack application with pagination, including search, sort, and filter functionalities to efficiently manage datasets.

#### Key Features:

- One can easily know about any product
- You can easily find products based on their categories.

Technology Used: React, ExpressJS, MongoDB, JavaScript, Firebase, Tailwind, Daisy ui

### About Khair Group

[Live Site](#) | [GitHub](#)

- The Abul Khair website is a frontend platform featuring a unique user interface (UI) design and advanced functionality. Built with Next.js, it ensures optimal performance and responsiveness across devices. Users can easily browse and discover a wide

Technology Used: React, ExpressJS, MongoDB, JavaScript, Tailwind, Daisy ui
